

## beginning of a word

Age has reached the end of the beginning of a word.  
May be guilty in his seems to passing a lot of  
different life became the appearance of the same  
day; May be back in the past, to oneself the  
paranoid weird belief disillusionment, these days,  
my mind has been very messy, in my mind constantly.  
Always feel oneself should go to do something, or  
write something. Twenty years of life trajectory  
deeply shallow, suddenly feel something, do it.
